Jenis penelitian yang digunakan adalah jenis penelitian yang bersifat deskriptif dengan sampel yang digunakan yaitu Ny. N Usia 25 tahun GIP00000 dengan alat ukur yang digunakan yaitu buku KIA, APN 60 langkah, partograf, Penapisan, APGAR skor, Kartu KB. Teknik analisa menggunakan manajemen asuhan kebidanan dengan menggunakan metode SOAP.

Adapun proses kehamilan pada Ny. N berlangsung dengan normal. Pada waktu kehamilannya Ny. N sering mengeluh sesak, nyeri uluh hati dan sakit gigi, keluhan yang dialami Ny. N termasuk normal pada kehamilannya. Kemudian Ny. N mengalami proses persalinan pada tanggal 22 Maret 2020, lama kala I 6 jam, kala II berlangsung selama 15 menit, kala III berlangsung selama 5 menit, kala IV selama 2 jam post partum. Bayi lahir spontan jenis kelamin perempuan, dengan berat lahir 3.000 gr, PB : 46 cm, A-S : 7-8, LK 32 cm, LD 34 cm. Pada kunjungan masa nifas Ny N mengalami nyeri pada abdomen karena kontraksi uterus yang baik. Kunjungan ketiga terdapat nyeri pada payudara karena ada bendungan ASI, tidak ada tanda-tanda bahaya pada ibu nifas. Pada kunjungan Neonatus dilakukan sebanyak 3x, dan tidak ditemukan tanda bahaya pada bayi Ny. N. Pada kunjungan keluarga berencana (KB) dilakukan sebanyak 1x dimana Ny. N sudah memilih menggunakan KB Suntik 3 bulan.

Berdasarkan hasil asuhan kebidanan *continuity of care* yang dilakukan pada Ny. N mulai dari masa kehamilan, persalinan, nifas, BBL dan KB dengan lancar dan normal. Diharapkan klien dapat menerapkan konseling yang telah diberikan selama asuhan kebidanan agar kondisi ibu dan bayi tetap baik.

KATA KUNCI : *continuity of care* , Kehamilan, Persalinan, Nifas, Neonatus, dan KB.

ABSTRACT

COMPREHENSIVE Midwifery Care in NY. "N" AGE 25 YEARS OF GIP00000 FROM PREGNANCY TO FAMILY PLANNING (KB) IN BPM BIDAN NIRA TRI SAFRILIANA, Amd. GANDING DISTRICT

This type of research is a descriptive type of research with the sample used is Ny. N Age 25 years GIP00000 with measuring instruments used are the KIA book, 60 steps APN, partograph, Screening, APGAR scores, family planning cards. The analysis technique uses midwifery care management using the SOAP method.

As for the pregnancy process at Mrs. N proceeded normally. At the time of her pregnancy, Mrs. N often complained of tightness, heartburn and toothache, the complaints experienced by Mrs. N is normal in pregnancy. Then Mrs. N underwent labor on March 22, 2020, the first period was 6 hours, the second stage lasted 15 minutes, the third time lasted 5 minutes, the IV took 2 hours post partum. The baby was born spontaneously by female sex, with birth weight of 3,000 gr, PB: 46 cm, A-S: 7-8, LK 32 cm, LD 34 cm. At the postpartum visit Mrs. N experienced pain in the abdomen due to good uterine contractions. The third visit there was pain in the breast because there was a dam of milk, there were no signs of danger to the postpartum mother. At the neonatal visit, it was done 3 times, and there were no signs of danger in the baby, Mrs. N. During the family planning visit (KB) was conducted once in which Mrs. N has chosen to use 3 months Injectable KB.

Based on the results of the continuity of care midwifery carried out on Mrs. N starting from pregnancy, childbirth, LBW and KB smoothly and normally. It is hoped that clients can apply the counseling that has been given during midwifery care so that the condition of the mother and baby remains good.

KEY WORDS: continuity of care, Pregnancy, Childbirth, Postpartum, Neonate, and KB.
