Program Studi Sarjana Kebidanan Universitas Wiraraja Sumenep

Pendahuluan: Ibu memiliki tingkat kehadiran rendah dalam mengikuti kegiatan posyandu, selain itu kader posyandu juga kurang aktif dalam kegiatan posyandu. **Tujuan:** Penelitian ini bertujuan untuk mengetahui hubungan peran kader dengan tingkat kehadiran ibu balita di posyandu. **Metode:** Penelitian ini menggunakan desain analitik korelasional dengan pendekatan *cross-sectional*, jumlah populasi sebanyak 35 orang diperoleh sampel dengan teknik *total sampling* yaitu 35 orang menggunakan alat ukur kuesioner dengan analisa data *rank spearman*. **Hasil :** Hasil penelitian ini didapatkan sebagian besar kader posyandu memiliki peran yang baik dalam kegiatan posyandu balita sebanyak 25 orang (71,4%), sebagian besar ibu rutin hadir ke posyandu balita sebanyak 22 orang (62,9%). Berdasarkan hasil uji *rank spearman* didapatkan p value 0,000 (<0,05), artinya ada hubungan peran kader dengan tingkat kehadiran ibu balita di Posyandu Bougenville Wilayah Kerja Puskesmas Galis Kabupaten Pamekasan. **Kesimpulan:** Kader posyandu memiliki peran penting bagi ibu balita dan keberlangsungan pelayanan posyandu balita, maka kader harus memiliki peran yang baik agar kegiatan posyandu berjalan dengan baik dan ibu balita rutin hadir mengikuti posyandu.

Kata kunci: peran kader, tingkat kehadiran ibu, posyandu

ABSTRACT

THE RELATIONSHIP BETWEEN THE ROLE OF *cadres* AND THE ATTENTION LEVEL OF MOTHERS UNDER CHILDREN AT POSYANDU

Introduction: Mothers have a low attendance rate in participating in posyandu activities, besides that posyandu cadres are also less active in posyandu activities. **Objective:** This study aims to determine the relationship between the role of cadres and the attendance rate of mothers under five in posyandu. **Methods:** This study used a correlational analytic design with a cross-sectional approach, with a total population of 35 people. The sample was obtained using a total sampling technique, namely 35 people using a questionnaire measuring tool with Spearman rank data analysis. **Results:** The results of this study showed that most of the posyandu cadres had a good role in the activities of the toddler posyandu as many as 25 people (71.4%), most mothers regularly attended the toddler posyandu as many as 22 people (62.9%). Based on the results of the Spearman rank test, a p value of 0.000 (<0.05) was obtained, meaning that there was a relationship between the role of cadres and the presence of mothers under five at the Bougenville Posyandu in the Working Area of the Galis Health Center, Pamekasan Regency. **Conclusion:** Posyandu cadres have an important role for mothers of toddlers and the continuity of Posyandu services for toddlers, so cadres must have a good role so that posyandu activities run well and mothers of toddlers attend the posyandu regularly.

Keywords: *the role of cadres, mother's attendance rate, posyandu*
