

INTISARI

Badan Usaha Milik Desa yang dirasikan mampu mempengaruhi peningkatan Pendapatan Asli Desa. Saat pengelolaan BUMDes maksimal maka pendapatan BUMDes akan meningkat dan akan berdampak terhadap peningkatan Pendapatan Asli Desa yang nantinya dapat digunakan untuk kesejahteraan ekonomi masyarakat, fasilitas-fasilitas desa dan program yang akan dijalankan. semakin baik pengelolaan BUMDes maka semakin tinggi pula Pendapatan Asli Desa. Tujuan dari penelitian ini untuk mengetahui pengaruh BUMDes terhadap peningkatan Pendapatan Asli Desa. metode yang digunakan dalam penelitian ini adalah deskriptif kuantitatif. Teknik analisa data yang digunakan diantaranya uji validitas, uji reliabilitas, uji asumsi klasik, uji normalitas, uji linearitas, uji homogenitas, dan uji regresi linier sederhana. Hasil penelitian ini menunjukkan Badan Usaha Milik Desa berpengaruh signifikan terhadap Pendapatan Asli Desa dengan pengaruh sebesar 0,676 atau 67,6% dan 32,4% di pengaruhi oleh faktor lain seperti Hasil Tanah Kas Desa dan juga Anggaran Dana Desa (ADD). sedangkan koefisien korelasi (R) sebesar 0,822. Hasilnya yaitu terdapat pengaruh variabel independen Badan Usaha Milik Desa terhadap Pendapatan Asli Desa.

Kata Kunci: Badan Usaha Milik Desa (BUMDes), Pendapatan Asli Desa

ABSTRACT

Village-Owned Enterprises that are felt to be able to influence the increase in Village Original Income. When BUMDes management is maximized, BUMDes income will increase and will have an impact on increasing Original Village Income which can later be used for the economic welfare of the community, village facilities and programs that will be implemented. The better the management of BUMDes, the higher the Village Original Income. The aim of this research is to determine the influence of BUMDes on increasing Village Original Income. The method used in this research is quantitative descriptive. Data analysis techniques used include validity tests, reliability tests, classical assumption tests, normality tests, linearity tests, homogeneity tests, and simple linear regression tests. The results of this research show that Village-Owned Enterprises have a significant influence on Village Original Income with an influence of 0.676 or 67.6% and 32.4% is influenced by other factors such as village treasury land proceeds and also the village fund budget. while the correlation coefficient (R) is 0.822. The result is that there is an influence of the independent variable Village-Owned Enterprises on Village Original Income.

Keywords: *Village Owned Enterprises (BUMDes), Village Original Income.*
